COGNITIVE SCIENCE

http://www.elsevier.com/locate/cogsci

Contents to Volume 26

Volume 26, Number 1 **January/February 2002**

Regular articles

Perceiving temporal regularity in music* 1
Edward W. Large, Caroline Palmer

Memory for goals: an activation-based model* 39
Erik M. Altmann, J. Gregory Trafton

Spanning seven orders of magnitude: a challenge for cognitive modeling 85
John R. Anderson

Learning words from sights and sounds: a computational model 113
Deb K. Roy, Alex P. Pentland

Volume 26, Number 2 **March/April 2002**

An effective metacognitive strategy: learning by doing and explaining with a computer-based Cognitive Tutor 147
Vincent A.W.M.M. Aleven, Kenneth R. Koedinger

Evidential diversity and premise probability in young children's inductive judgment 181
Yafen Lo, Ashley Sides, Joseph Rozelle, Daniel Osherson

Eye scanpaths during visual imagery reenact those of perception of the same visual scene 207
Bruno Laeng, Dinu-Stefan Teodorescu

Erratum

Erratum to "Memories for goals: an activation-based model" 233
Erik M. Altmann, J. Gregory Trafton

*This paper was selected for publication during the Editorship of James Greeno

PII: S0364-0213(02)00107-6

Volume 26, Number 3 May/June 2002

Special Section on Linguistically Apt Statistical Models
Guest Editor: Jason Eisner

Introduction to the special section on linguistically apt statistical models 235
Jason Eisner

Statistical models of syntax learning and use 239
Marc Johnson, Stefan Riezler

Discovering syntactic deep structure via Bayesian statistics 255
Jason Eisner

Statistical models for the induction and use of selectional preferences 269
Mark Light, Warren Greiff

Modelling asynchrony in automatic speech recognition using loosely coupled hidden Markov models 283
H.J. Nock, S.J. Young

Extended article
A simplicity principle in unsupervised human categorization 303
Emmanuel M. Pothos, Nick Chater

Regular article
A non-representational approach to imagined action 345
Iris van Rooij, Raoul M. Bongers, W. (Pim) F.G. Haselager

Brief report
Asymmetric interference in 3- to 4-month-olds' sequential category learning 377
Denis Mareschal, Paul C. Quinn, Robert M. French

Announcement 391

Volume 26, Number 4 July/August 2002

The distributional structure of grammatical categories in speech to young children 393
Toben H. Mintz, Elissa L. Newport, Thomas G. Bever

Strategies in sentential reasoning 425
Jean-Baptiste Van der Henst, Yingrui Yang, P.N. Johnson-Laird

Cognitively active externalization for situated reflection 469
Hajime Shirouzu, Naomi Miyake, Hiroyuki Masukawa

Brief report
Learning representations in a gated prefrontal cortex model of dynamic task switching 503
Nicolas P. Rougier, Randall C. O'Reilly

Volume 26, Number 5 September/October 2002

Extended articles

The misunderstood limits of folk science: an illusion of explanatory depth 521
Leonid Rozenblit, Frank Keil

PROBabilities from EXemplars (PROBEX): a "lazy" algorithm for probabilistic inference from generic knowledge 563
Peter Juslin, Magnus Persson

Symbolically speaking: a connectionist model of sentence production 609
Franklin Chang

Regular article

Cultural preferences for formal versus intuitive reasoning 653
Ara Norenzayan, Edward E. Smith, Beom Jun Kim, Richard E. Nisbett

Volume 26, Number 6 November/December 2002

Extended article

Electrifying diagrams for learning: principles for complex representational systems 685
Peter C.-H. Cheng

Regular articles

Overtensing and the effect of regularity 737
Joseph Paul Stemberger

Circular reasoning 767
Lance J. Rips

Face recognition algorithms and the other-race effect: computational mechanisms for a developmental contact hypothesis 797
Nicholas Furl, P. Jonathon Phillips, Alice J. O'Toole

Brief report

Gesture offers insight into problem-solving in adults and children 817
Philip Garber, Susan Goldin-Meadow
